

This section contains music I've made either from my keyboard or using a computer mixer. They were originally for a game I was going to help make over a decade ago but since then was canceled. Use them in your games, just give me credit. These songs may not be used for commercial purposes whatsoever without my permission. You may not sell them. I'll come kick your butt if I find out you are. Small
warning: Some of these songs suck, yea I know, I was like 10 when I made some of these!

Miscellaneous Songs
